

## **Prometheus**

**Prometheus is an open-source system monitoring and alerting toolkit originally built at SoundCloud. It is now a standalone open source project . Prometheus joined the Cloud Native Computing Foundation in 2016 as the second hosted project, after Kubernetes.**

### **Prometheus Architecture**

**Prometheus Server** – Collects and stores metrics.

**Pushgateway** – Receives metrics from short-lived jobs.

**Exporters** – Agents that expose metrics (e.g., Node Exporter for system stats).

**Alertmanager** – Handles alerts based on defined rules

**Grafana (Optional)** – For visualization.

### **Common Prometheus Commands**

```
sh CopyEdit prometheus --  
config.file=prometheus.yml curl  
http://localhost:9090/metrics promtool  
check config prometheus.yml promtool  
query instant up
```

### **Common Prometheus Use Cases**

- Monitoring Kubernetes clusters
- Tracking system health (CPU, RAM, disk, network)
- Alerting on performance issues
- Logging API response times
- Monitoring microservices

## Features

1. a multi-dimensional data model with time series data identified by metric name and key/value pairs
2. PromQL, a flexible query language to leverage this dimensionality
3. no reliance on distributed storage; single server nodes are autonomous
4. time series collection happens via a pull model over HTTP
5. pushing time series is supported via an intermediary gateway
6. targets are discovered via service discovery or static configuration
7. multiple modes of graphing and dashboarding support

## PROMETHEUS INSTALLATION:

**sudo useradd \**

**--system \**

**--no-create-home \**

**--shell /bin/false prometheus**

**wget**

**<https://github.com/prometheus/prometheus/releases/download/v2.47.1/prometheus-2.47.1.linux-amd64.tar.gz> tar -xvf prometheus-2.47.1.linux-amd64.tar.gz sudo**

**mkdir -p /data /etc/prometheus cd prometheus-2.47.1.linux-amd64/ sudo mv**

**prometheus promtool /usr/local/bin/ sudo mv consoles/ console\_libraries/**

**/etc/prometheus/ sudo mv prometheus.yml /etc/prometheus/prometheus.yml**

**sudo chown -R prometheus:prometheus /etc/prometheus/ /data/**

**sudo chown -R prometheus:prometheus /etc/prometheus/ /data/**

**[12:00 PM, 3/22/2025] +91 90928 13114: cd rm -**

**rf prometheus-2.47.1.linux-amd64.tar.gz**

**prometheus --version sudo vim**

**/etc/systemd/system/prometheus.service [12:09**

**PM, 3/22/2025] +91 90928 13114: [Unit]**

**- job\_name: 'jenkins' metrics\_path: '/prometheus'**

**static\_configs:**

```
- targets: ['<jenkins-ip>:8080promtool check config
/etc/prometheus/prometheus.yml curl -X POST
http://localhost:9090/-/reload sudo apt-get install -y
apt-transport-https software-properties-common
wget -q -O - https://packages.grafana.com/gpg.key |
sudo apt-key add -
```

```
echo "deb https://packages.grafana.com/oss/deb stable main" | sudo tee -a
/etc/apt/sources.list.d/grafana.list
```

```
sudo apt-get update sudo apt-get -y
```

```
install grafana sudo systemctl enable
```

```
grafana-server sudo systemctl start
```

```
grafana-server sudo systemctl status
```

```
grafana-server
```

The screenshot shows the Prometheus web interface at localhost:9090/targets?search=. The 'Targets' page displays a list of configured scrape targets. The 'jenkins' target is marked as 'DOWN' with an error message 'server returned HTTP status 403 Forbidden'. The 'node\_export' and 'prometheus' targets are marked as 'UP'.

Endpoint	State	Labels	Last Scrape	Scrape Duration	Error
<strong>jenkins (0/1 up)</strong> <a href="#">View logs</a>					
http://localhost:8080/prometheus	DOWN	instance="localhost:8080" job="jenkins"	10.32s ago	6.263ms	server returned HTTP status 403 Forbidden
<strong>node_export (1/1 up)</strong> <a href="#">View logs</a>					
http://localhost:9100/metrics	UP	instance="localhost:9100" job="node_export"	14.47s ago	37.463ms	
<strong>prometheus (1/1 up)</strong> <a href="#">View logs</a>					
http://localhost:9090/metrics	UP	instance="localhost:9090" job="prometheus"	7.889s ago	4.954ms

```

## QUERY:

**rate(node\_cpu\_seconds\_total{mode="system"}[1m])**

**node\_cpu\_seconds\_total**: This metric represents the total CPU time spent in different modes (user, system, idle, etc.). **mode="system"**: Filters only CPU time spent in **system/kernel mode**.

**rate(...[1m])**: Calculates the **per-second increase** of this metric over the last **1 minute**.

## What it does:

This query shows the **CPU usage in system mode per second** over the past 1 minute.

Useful for detecting high system resource consumption by kernel processes.

**`rate(node_network_receive_bytes_total[1m])`**

**`node_load15`**

## GRAFANA:

**Grafana** is an **open-source analytics and visualization platform** used for **monitoring and observability**. It allows users to create **interactive dashboards** from multiple data sources like **Prometheus, InfluxDB, Elasticsearch, MySQL, and more**.

## GRAFANA INSTALLATION:

```
sudo apt-get install -y apt-transport-https software-properties-common
wget -q -O - https://packages.grafana.com/gpg.key | sudo apt-key add echo
"deb https://packages.grafana.com/oss/deb stable main" | sudo tee -a
/etc/apt/sources.list.d/grafana.list
sudo apt-get update sudo apt-get -y
install grafana sudo systemctl enable
grafana-server sudo systemctl start
grafana-server sudo systemctl status
grafana-server
```

Features:

- CPU (system, user, nice, iowait, steal, idle, irq, softirq, guest)
- Memory (Apps, Buffers, Cached, Free, Sla, SwapCached, PageTables, VmallocUser, Swap, Committed, Mapped, Active, Inactive)
- Load
- Disk Space Used in percent
- Disk Utilization per Device
- Disk IOS per device (read, write)
- Disk Throughput per Device (read, write)
- Context Switches
- Network Traffic (In, Out)
- Netstat (Established)
- UDP stats (InDatagrams, InErrors, OutDatagrams, NoPorts)
- Conntrack

Using negative Y-axes to be able to show both reads and writes in the same graphs nicely.

Updated 03.05.2017 with sort ordering for node selector.

Updated 11.07.2017 switched to show disk usage using node\_filesystem\_avail rather than node\_filesystem\_free. This avoids situations where the dashboard shows that there is available space while 'df -h' reports that it is full.

Updated 31.07.2018 supports node\_exporter 0.16 as well as older version. For supporting really old versions of node exporter the template variable needs to be altered to use something like up(job="my\_job") since node\_exporter\_build\_info has not been around forever.
